

TODO List App

The todo list app is an app for organizing and prioritizing tasks. Below are the app specs. The app can:

- Add a new task to the todo list (Name, description, priority{high,med,low} and automatic date of creation)[make a unique image for high, med and low priority tasks] [Attaching a file is a bonus][adding a reminder is a bonus]
- View all the tasks in the todo list
- View the details of a certain task [if you attached a file you must view it here after clicking on some place][if you added a reminder you must view it here]
- Remove any task from the todo list
- Edit any task in the todo list (You must take confirmation before Done Editing a task) [I can Edit the reminder if you have one][Editing the attached file if you have one is a bonus]
- Mark any task as in progress, done (Note that the in Progress task can't be marked as to-do and done task can't be marked as in progress).
- You can search a task by name (if there is no result, indicate this in a pretty way)
- You can view tasks by [all notes, to-do, in progress, done, priority] via segmented control (Note that if I sort by priority, each type of the priority must be in a different section)
- All Tasks and changed on it are saved Locally (I can view it any time I visit the app)
You will work individual.
